

Its time to make the Oregonians **DANGEROUS**
Department of Environmental Quality safe. Put
an end to **UNREGULATED REGULATION.**

WHAT THE PETITION DOES

This petition will put a **HALT** to the Oregon Department of Environmental Controls out of control, and unregulated, regulation over our Natural Resource Industries. This Petition gives stake holders, those whose livelihoods depend on the environmental quality of Oregon, a seat at the table. Putting representatives from Mining, Timber, Farming, and Manufacturing on the 5-person commission at DEQ. Representatives from our natural resource industries ensures not only that our voices are heard, but it ensures that true experts in the field can weigh in on what is best. It also will stop the Governor from being able to remove representatives. Currently the commission is appointed without any criteria, and can be removed at anytime without reason.
